

ELECTIVE POSTING FOR IIIrd MBBS PART I STUDENTS

PREFACE

The new curriculum introduced in 2019 by NMC in form of competency based medical education is already a milestone change in medical education system of India. Various additions such as teaching of attitude and communication skills, integration, early clinical exposure, and skill-based training are some of the salient features of this system. Another important addition to this group is **Electives**.

Electives are the learning experiences, which are student centric and created in the curriculum itself to provide opportunities for the learner to explore and unfold the areas of interest in the medical profession. These small duration courses can cover the fields of research, education, experimental laboratory work, community postings, or other specialty-specific courses. Electives can prepare the budding medical graduate for the future by increasing the vocational opportunities.

Under the leadership of Hon. Dean Dr. Sajal Mitra a committee has been formed for formulating and implementation of the Electives at the college level. The committee comprises of following members: -

Name	Department
Dr Madhur Gupta	Biochemistry
Dr. Anne Wilkinson	Pathology
Dr. Deepali Onkar	Anatomy
Dr. Neena Nagdeo	Microbiology
Dr. Vivek Harkare	Otorhinolaryngology
Dr. Tanuja Manohar	General Medicine
Dr. Harsh Salankar	Pharmacology
Dr. Sonali Khadakkar	Otorhinolaryngology

A special mention has to be given to Ms. Deepa Chouhan for her untiring support.

Dr. Madhur Gupta
Coordinator
Curriculum Committee
NKP SIMS & RC and LMH, Nagpur
