Skills like communication, Attitude which are needed by health care professionals were elaborated by the trainer.

Students participated actively in the interactive session.

## from Editor's pen

Dr. Kalpana Date

### From editor's pen "Brighten the corner where you are."

Your attitude affects every single aspect of your life - from your personal life to your professional life, to the lives of the patients you take care of.

Maintaining a positive attitude throughout your personal and professional life can help you find healthy coping mechanisms for stressors and challenges. With a positive attitude, you may be able overcome obstacles more easily.

The first step to maintaining a positive attitude is to recognize and accept your feelings, especially the negative ones. Denying or suppressing them can lead to more stress, frustration, and burnout.

Focus on what you can control, rather than what you cannot. You cannot always change the external factors that cause stress, such as workload, deadlines. However, you can control how you react to them, how you manage your time, and how you prioritize your tasks

The way you think and believe about yourself, your work, and your challenges can affect your attitude and behaviour. Therefore, you can try to reframe your thoughts and beliefs in a more positive and realistic way.

Learn and grow from your experiences, both positive and negative. You can do this by reflecting on what went well and what did not, what you learned and what you can improve, and what you can apply and what you can change. You can also seek feedback and learning opportunities from others, such as mentor and peers. By doing so, you can enhance your knowledge, skills, and performance which will eventually make you more confident.

As healthcare professionals, maintaining a positive attitude amidst challenging situations is crucial, not just for our own well-being but also for the effectiveness of our care.

## Departmental Snippets

**Brainstorming session for implementation of CBME** curriculum in Microbiology Department of Microbiology organized a "Brainstorming session for implementation of CBME curriculum in Microbiology" on 12th August from 12 noon onwards. Each medical Institute of Vidarbha was allotted with a topic which was presented by faculty nominated by that institute to initiate the discussion, followed by brainstorming on that topic.
