COLLEGE STUDENTS' COUNCIL 2025-26

Installation Ceremony of the College Students Council was held on 29th April 2025, marking a significant occasion in the academic year. The event commenced with a vibrant opening, with the college campus decked out in colorful banners and flags. Distinguished guests and dignitaries, Rtn. Rajinder Singh Khurana, District governor RI 3030, and Shri Ranjeetbabu Deshmukh were prominently present. Dean, Dr. Sajal Mitra addressed the gathering, offering words of encouragement and guidance to the newly elected council members, emphasizing the importance of leadership and responsibility.

The newly appointed Chairperson, Dr. Rakhee Tirpude shared plans for leading the council towards excellence, igniting a sense of purpose and determination and also officially announced four different clubs, the first in college.

The new Student Council President, Ms. Devanshi Rathod, outlined the vision and goals for the upcoming academic year. The General Secretary, Mr. Himanshu Dandekar of the incoming council extended a vote of thanks,

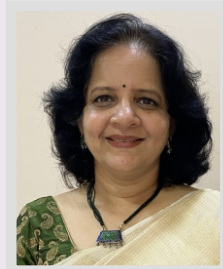

Graduation Ceremony

The graduation ceremony of the batch 2019 was held with great enthusiasm and pride on April 21, 2025, at Suresh Bhat Auditorium. The event marked the culmination of years of hard work, dedication, and growth for the graduating students.

The Chief Guest for the ceremony was Dr. P.P. Joshi, with the Guest of honor Dr. Ashish Deshmukh, who delivered an inspiring speech, encouraging students to pursue their passions and contribute meaningfully to society. This was followed by the distribution of certificates and awards, recognizing academic excellence, leadership, and outstanding extracurricular achievements. The ceremony concluded with the traditional cap toss, symbolizing the end of one chapter and the beginning of another.

Quality Assurance in Medical Education

With India having the large number of medical colleges and these numbers are increasing every year, quality assurance (QA) in medical education is a matter of concern.

There are areas of concern about the quality of the graduates and therefore about patient safety. The process of recognition of these colleges is based on fulfilment of input standards regarding infrastructure facilities and the faculty. The assumption here is that if input standards i. e. minimum requirements are met, the products of the educational system would be of acceptable standards and this is an area of concern as this need not always be true in every medical college in every state of India.

Quality assurance (QA) in medical education ensures that medical training programs meet established standards, ultimately contributing to the delivery of high-quality healthcare. It involves a systematic approach to evaluating and improving the structure, processes, and outcomes of medical education. This includes assessing curriculum, teaching methods, assessment strategies, and the overall learning environment.

There should be regular assessment of the effectiveness of educational programs against established standards. Utilizing feedback from students, faculty, and other stakeholders to identify areas for enhancement. Involving external bodies to assess and accredit medical colleges and programs, ensuring they meet quality benchmarks. Adopting a culture of ongoing evaluation and improvement in medical education is a necessity. All this is important as High-quality medical education is crucial for producing competent and safe healthcare professionals, which directly impacts patient care. QA processes also encourage continuous learning and improvement among medical educators and practitioners.

Departmental Snippets
